Index of Feature Material

MATERIALS & METHODS

Volume 34

July—December 1951, Inclusive

Feature editorial matter from Volume 34 of MATERIALS & METHODS covering issues from July through December 1951 is indexed here. Material covered in the index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts.

Aluminum and Its Alloys:

Cold Headed Parts (MATERIALS & METHODS Manual)—Nov., p. 85
Die Castings (MATERIALS & METHODS Manual)—Aug., p. 83
K-150 Fills Gap Between Established Aluminum Alloys—Aug., p. 74
Rare Earths in Aluminum Baths Give Attractive Hot-Dip Coatings—Sept., p. 95
Resistance Welding of Aluminum, Steels and Coated Metals Improved by Slope Control—Aug., p. 80
Rolled Aluminum Bushings Low in Cost, High in Strength—Dec., p. 174
Stiffness and Strength of Structural Metals, Scales for Determining (File Fact)—Dec., p. 107
Weights of Magnesium, Aluminum and Steels, Nomogram for Comparing (File Fact)—Dec., p. 105
Boron Steels, Role in the Present Emergency—Aug., p. 57
Boron Steels, Heat Treating the Carburizing Grades of—Nov., p. 66

Brazing (see Welding)

Castings and Casting:

Colloidal Graphite Serves as Lubricant in Hot and Cold Forming of Metal—Oct., p. 180
Copper-Base Die Castings Now More Widely Used—Oct., p. 92
Die Castings (MATERIALS & METHODS Manual)—Aug., p. 83
Die Castings, Microphones Make Good Use of—Nov., p. 69
Gray Iron Castings, Advantages of Designing with—Dec., p. 63
Precision Castings vs Electroforming for Microwave Components—July, p. 70
Steel Castings and Welding Can Be Combined Successfully—July, p. 73
Chromium Carbides Have High Temperature and Corrosion Resistance, New—Dec., p. 69

Cleaning and Finishing:

De-Enameling Process Economically Reclaims Defective Enameled Ware—Nov., p. 80
Salt Baths for Metal Treating (MATERIAL & METHODS Manual)—Oct., p. 115

Coatings and Finishes:

Prosphate Coatings, The Basic Types and Where to Use Them—Oct., p. 100
Rare Earths in Aluminum Baths Give Attractive Hot-Dip Coatings—Sept., p. 95
Tin Alloy Coatings Are Promising Alternates for Tin Plate—Dec., p. 70
Vinyl Formulations Widen Applications of These Resins, Three—Sept., p. 148
Volatile Crystals Prevent Corrosion of Packaged Steel Parts—Dec., p. 84
Waxes Now Used to Process As Well As to Protect Materials—Oct., p. 104
Cold Headed Parts (MATERIALS & METHODS Manual)—Nov., p. 85
Colloidal Graphite Serves as Lubricant in Hot and Cold Forming of Metal—Oct., p. 180
Continuous Furnaces Economically Treat a Variety of Parts—Dec., p. 87
Copper-Base Castings Now More Widely Used—Oct., p. 92

Copper, Brass and Bronze:

Cold Headed Parts (MATERIAL & METHODS Manual)—Nov., p. 85
Copper-Base Die Castings Now More Widely Used—Oct., p. 92
Die Castings (MATERIALS & METHODS Manual)—Aug., p. 83
High Quality Nonferrous Castings Assured by Use of Radiography—Dec., p. 73
Phosphor Bronzes, The Wrought (MATERIALS & METHODS Manual)—Sept., p. 97
Crude Sponge Rubber, Swelling and Tensile Characteristics When Immersed in Common Oils and Solids (File Fact)—Sept., p. 115
De-Enameling Process Economically Reclaims Defective Enameled Ware—Nov., p. 80
Die Castings (MATERIALS & METHODS Manual)—Aug., p. 83
Die Castings, Microphones Make Good Use of—Nov., p. 69
Direct Forming of Rubber and Plastic Products from Dispersions—Aug., p. 64
Electrodeposited Tin Alloy Coatings Are Promising Alternates for Tin Plate—Dec., p. 70
Electronic Cores, Produced from Metal Powders, Manufacturers' Designations for (File Fact)—Nov., p. 103

Engineering File Facts:

Crude Sponge Rubber, Swelling and Tensile Characteristics When Immersed in Common Oils and Solids—Sept., p. 115
Electronic Cores Produced from Metal Powders, Manufacturers' Designations for—Nov., p. 103
High Carbon Steels, Typical Properties—Nov., p. 101
Low Carbon Steels, Typical Properties—Aug., p. 99
Medium Carbon Steels, Typical Properties—Aug., p. 101
Stainless Steel Tubing, High Temperature Properties of—Sept., p. 113
Steel Compositions to Conserve Critical Alloying Elements, New—Oct., p. 135
Stiffness and Strength of Structural Metals, Scales for Determining—Dec., p. 107
Vanadium Spring Steels, Typical Properties—July, p. 113
Weights of Magnesium, Aluminum and Steels, Nomogram for Comparing—Dec., p. 105
Expanded Metals Save Weight and Materials—Sept., p. 74

Fabricated Forms and Parts:

Cold Headed Parts (MATERIALS & METHODS Manual)—Nov., p. 85
Expanded Metals Save Weight and Materials—Sept., p. 74
Knitted Metal Parts Have Unique Industrial Applications—Aug., p. 61
Precision Casting vs Electroforming for Microwave Components—July, p. 70
Rolled Aluminum Bushings Low in Cost, High in Strength—Dec., p. 174
Steel Castings and Welding Can Be Combined Successfully—July, p. 73
Ferrite Materials Permit Improved Designs of Magnetic Devices—July, p. 76
Flexible Sealers Find Wide Use in Industry—July, p. 66

Forming:

Colloidal Graphite Serves as Lubricant in Hot and Cold Forming of Metal—Oct., p. 180
Direct Forming of Rubber and Plastic Products from Dispersions—Aug., p. 64
Metal Treating Process Speeds Cold Working, Cold Extrusion of Steel, New—Aug., p. 68
Gray Iron Castings, Advantages of Designing with—Dec., p. 63
Hard, Brittle Materials Machined Using Ultrasonic Vibrations—Sept., p. 92
Hardening Compound Carburizes, Nitrides and Chromizes Steel—July, p. 86

Heating and Heat Treatment:

Boron Steels, Heat Treating the Carburizing Grades of—Nov., p. 66
Continuous Furnaces Economically Treat a Variety of Parts—Dec., p. 87
Hardening Compound Carburizes, Nitrides and Chromizes Steel—July, p. 86
Salt Baths for Metal Treating (MATERIALS & METHODS Manual)—Oct., p. 115
High Carbon Steels, Typical Properties (File Fact)—Nov., p. 101
High Chromium Steels Resist Attack by Liquid Bismuth Alloys—Oct., p. 112
High Quality Nonferrous Castings Assured by Use of Radiography—Dec., p. 73
K-150 Fills Gap Between Established Aluminum Alloys—Aug., p. 74
Knitted Metal Parts Have Unique Industrial Applications—Aug., p. 61
Laminated Plastics of the Asbestos Graphite Grades, How to Machine—Nov., p. 82
Low Carbon Steels, Typical Properties (File Fact)—Aug., p. 99
Low Hydrogen Electrodes, High Quality Welds Obtained with—Sept., p. 90
Low Pressure Molded Glass Fiber Parts, Economical and Small Runs—Sept., p. 78

Magnesium:

Die Castings (MATERIALS & METHODS Manual)—Aug., p. 83
Weights of Magnesium, Aluminum and Steels, Nomogram for Comparing (File Fact)—Dec., p. 105
Stiffness and Strength of Structural Metals, Scales for Determining (File Fact)—Dec., p. 107

Manuals, Materials & Methods:

Cold Headed Parts—Nov., p. 85
Die Castings—Aug., p. 83
Materials Shortages, How to Overcome—July, p. 89
Phosphor Bronzes, The Wrought—Sept., p. 97
Salt Baths for Metal Treating—Oct., p. 115
Titanium, Zirconium, Molybdenum, Tungsten, Tantalum, Columbium, Vanadium, Hafnium—Dec., p. 89
Materials Engineering Plays Important Role in Development of P & WA Jet Engines—Oct., p. 85
Materials Shortages, How to Overcome (MATERIALS & METHODS Manual)—July, p. 89
Medium Carbon Steels, Typical Properties (File Fact)—Aug., p. 101
Metals and Nonmetals Joined Efficiently by Stitching—Dec., p. 76
Metal Treating Process Speeds Cold Working, Cold Extrusions of Steel, New—Aug., p. 68

Nickel and Its Alloys:

Cold Headed Parts (MATERIALS & METHODS Manual)—Nov., p. 85
Nickel and Cobalt, Present and Future—July, p. 61
Nickel and High Nickel Alloys, How to Join by Resistance Welding—Oct., p. 95

Noble and Other Metals:

Nickel and Cobalt, Present and Future—July, p. 61
Tin and Tungsten—Their Past, Present and Future—Sept., p. 69
Titanium, Zirconium, Molybdenum, Tungsten, Tantalum, Columbium, Vanadium, Hafnium (MATERIALS & METHODS Manual)—Dec., p. 89

Nonmetalic Materials and Plastics:

Chromium Carbides Have High Tempera-

ture and Corrosion Resistance, New—Dec., p. 69
Crude Sponge Rubber, Swelling and Tensile Characteristics When Immersed in Common Oils and Solids (File Fact)—Sept., p. 115
Direct Forming of Rubber and Plastic Products from Dispersions—Aug., p. 64
Ferrite Materials Permit Improved Designs of Magnetic Devices—July, p. 76
Flexible Sealers Find Wide Use in Industry—July, p. 66
Laminated Plastics of the Asbestos Graphite Grades, How to Machine—Nov., p. 82
Low Pressure Molded Glass Fiber Parts, Economical in Small Runs—Sept., p. 78
Polyethylene Plastics, New Forming Methods Expand Use of—Oct., p. 88
Silicon Carbide Refractories Used as Alternates for Special Service Alloys—Nov., p. 71
Structural Adhesives—July, p. 80
Synthetic Fibers Show Promise of Wide Use in Industry, New—Aug., p. 76
Vinyl Formulations Widen Applications of These Resins, Three—Sept., p. 148
Waxes Now Used to Process As Well As to Protect Materials—Oct., p. 104
Phosphate Coatings, The Basic Types and Where to Use Them—Oct., p. 100
Phosphor Bronzes, The Wrought (Materials & Methods Manual)—Sept., p. 97

Powder Metallurgy:

Electronic Cores Produced from Metal Powders, Manufacturers' Designations for (File Fact)—Nov., p. 103
Precision Casting vs Electroforming for Microwave Components—July, p. 70
Rare Earths in Aluminum Baths Give Attractive Hot Dip Coatings—Sept., p. 95
Resistance Welding of Aluminum, Steels and Coated Metals Improved by Slope Control—Aug., p. 80
Rolled Aluminum Bushings Low in Cost, High in Strength—Dec., p. 174
Salt Baths for Metal Treating (Materials & Methods Manual)—Oct., p. 115
Silicon Carbide Refractories Used as Alternates for Special Service Alloys—Nov., p. 71

Steels:

Boron Steels, Heat Treating the Carburizing Grades of—Nov., p. 66
Boron Steels, Role in the Present Emergency—Aug., p. 57
Cold Headed Parts (Materials & Methods Manual)—Nov., p. 85
Hardening Compound Carburizes, Nitrides and Chromizes Steel—July, p. 86
High Carbon Steels, Typical Properties (File Fact)—Nov., p. 101
High Chromium Steels Resist Attack by Liquid Bismuth Alloys—Oct., p. 112
Low Carbon Steels, Typical Properties (File Fact)—Aug., p. 99
Medium Carbon Steels, Typical Properties (File Fact)—Aug., p. 101
Metal Treating Process Speeds Cold Working, Cold Extrusion of Steel, New—Aug., p. 68
Resistance Welding of Aluminum, Steels and Coated Metals Improved by Slope Control—Aug., p. 80
Stainless Steel Tubing, High Temperature Properties of (File Fact)—Sept., p. 113
Steel Castings and Welding Can Be Combined Successfully—July, p. 73
Steel Composition to Conserve Critical Alloying Elements, New (File Fact)—Oct., p. 135
Stiffness and Strength of Structural Metals, Scales for Determining (File Fact)—Dec., p. 107
Toughness of Steels, How to Determine from Notched Bar Tests—Sept., p. 81
Vanadium Spring Steels, Typical Properties (File Fact)—July, p. 113
Weights of Magnesium, Aluminum and Steels, Nomogram for Comparing (File Fact)—Dec., p. 105
Welding Unstabilized Austenitic Stainless Steel without Carbide Precipitation—Nov., p. 64
Stiffness and Strength of Structural Metals, Scales for Determining (File Fact)—Dec., p. 107
Structural Adhesives—July, p. 80
Synthetic Fibers Show Promise of Wide Use in Industry, New—Aug., p. 76

Testing and Inspection:

High Quality Nonferrous Castings Assured by Use of Radiography—Dec., p. 73
Toughness of Steels, How to Determine from Notched Bar Tests—Sept., p. 81

Tin:

Tin Alloy Coatings Are Promising Alternates for Tin Plate—Dec., p. 70
Tin and Tungsten—Their Past, Present and Future—Sept., p. 69
White-to-Grey Tin Formation—A Discussion—Nov., p. 136
White-to-Grey Tin Formation in Refrigeration Equipment—Aug., p. 136
Titanium, Zirconium, Molybdenum, Tungsten, Tantalum, Columbium, Vanadium, Hafnium (Materials & Methods Manual)—Dec., p. 89
Toughness of Steels, How to Determine from Notched Bar Tests—Sept., p. 81
Vanadium Spring Steels, Typical Properties (File Fact)—July, p. 113
Vinyl Formulations Widen Applications of These Resins, Three—Sept., p. 148
Volatile Crystals Prevent Corrosion of Packaged Steel Parts—Dec., p. 84
Waxes Now Used to Process As Well As to Protect Materials—Oct., p. 104
Weights of Magnesium, Aluminum and Steel, Nomogram for Comparing (File Fact)—Dec., p. 105

Welding and Joining:

Low Hydrogen Electrodes, High Quality Welds Obtained with—Sept., p. 90
Metals and Nonmetals Joined Efficiently by Stitching—Dec., p. 76
Nickel and High Nickel Alloys, How to Join by Resistance Welding—Oct., p. 95
Resistance Welding of Aluminum, Steels and Coated Metals Improved by Slope Control—Aug., p. 80
Salt Baths for Metal Treating (Materials & Methods Manual)—Oct., p. 115
Steel Castings and Welding Can Be Combined Successfully—July, p. 73
Structural Adhesives—July, p. 80
Welding Unstabilized Austenitic Stainless Steel Without Carbide Precipitation—Nov., p. 64
White-to-Grey Tin Formation—A Discussion—Nov., p. 136
White-to-Grey Tin Formation in Refrigeration Equipment—Aug., p. 136

Zinc:

Die Castings (Materials & Methods Manual)—Aug., p. 83
Die Castings, Microphones Make Good Use of—Nov., p. 69
Zinc—Its Sources, Uses and Supply—Nov., p. 59

Authors' Index

Ayres, Robert F., Phosphate Coatings, The Basic Types and Where to Use Them—Oct., p. 100
Birmingham, Chris D., Low Pressure Molded Glass Fiber Parts, Economical in Small Runs—Sept., p. 78
Both, Eberhard, Ferrite Materials Permit Improved Designs of Magnetic Devices—July, p. 76
Brosky, Stanley A. (see Johnson, Charles B.)
Burgess, C. O., Gray Iron Castings, Advantages of Designing with—Dec., p. 63
Burroughs, L. R., Die Castings, Microphones Make Good Use of—Nov., p. 69
Cady, Edwin Laird, Low Hydrogen Electrodes, High Quality Welds Obtained with—Sept., p. 90
Clauser, H. R., Materials Shortages, How to Overcome (Materials & Methods Manual)—July, p. 89
Crankshaw, Alden, Colloidal Graphite Serves as Lubricant in Hot and Cold Forming of Metal—Oct., p. 180
Denne, Arthur G., Metals and Nonmetals Joined Efficiently by Stitching—Dec., p. 76
Dirkes, Lt. William E., Structural Adhesives—July, p. 80
Du Mond, T. C., Die Castings (Materials & Methods Manual)—Aug., p. 83
Ellsworth, E. M., Hardening Compound Carburizes, Nitrides and Chromizes Steel—July, p. 86
Everhart, John L.
Silicon Carbide Refractories Used as Alternates for Special Service Alloys—Nov., p. 71
Phosphor Bronzes, The Wrought (Materials & Methods Manual)—Sept., p. 97
Titanium, Zirconium, Molybdenum, Tungsten, Tantalum, Columbium, Vanadium, Hafnium (Materials & Methods Manual)—Dec., p. 89
